

Advancing Decision Intelligence with Agentic AI

 **October 16
2025**

 **ExCel London,
ICC Maritime**

 **Advocate 7**

Experience the Future of Agentic AI with Trendence's Four-Pronged Approach

AI-Native Data Foundations

Unify fragmented data into an AI-ready foundation on Databricks to accelerate scalable, insight-driven decision-making.

Autonomous Agentic AI

Deploy adaptive AI agents using Mosaic AI to optimize operations and decisions with minimal human intervention.

GenAI-Powered Decision Intelligence

Transform dashboards into GenAI copilots that deliver insights, recommend actions, and drive real-time decisions.

Responsible and Scalable AI Adoption

Ensure scalable AI adoption with secure, compliant, and transparent frameworks grounded in observability and ethical AI.

Tredence Exhibits at Databricks Data+AI World Tour '25

Experience live demos at our **Booth #7** to explore how Tredence's innovative solutions, powered by GenAI, are driving transformative outcomes for businesses across industries.

01 Activate GenAI & Agentic AI for Smarter, Faster Outcomes

Tredence's suite of Agentic AI solutions transforms enterprise operations with autonomous, context-aware agents built for real business impact. Each agent is purpose-built to drive precision, efficiency, and scale across critical business functions.

Data Engineering Agentic Solutions

Modernize, optimize and govern enterprise data with:

- Code Converter Agent
- Pipeline & Data Observability Agent
- Cost Observability Agent
- Data Quality Agent

Domain-specific Agentic Solutions

Accelerate decisions across business functions:

- Category Performance Agent
- Customer Engagement Agent
- Product Quality Agent
- Store Ops Agent
- Supply Risk Agent
- Trade Fund Compliance Agent
- Promotion Effectiveness Agent
- Sales & Operations Agent
- Travel IQ - Unified Customer Intelligence

02 Migrate to Modernize with GenAI

Tredence helps businesses migrate and modernize data using Databricks Lakehouse Platform, Mosaic AI, and GenAI accelerators to drive:

30-40% faster time-to-value

with LLM-powered automation and pre-trained DBRX models

500+ KPI-ready data models

across 20+ business domains

60% less effort, 70% lower cost

for legacy-to-Lakehouse migrations

Built-in governance & QA

via GenAI-led frameworks

Rapid AI & GenAI scale-up

with ATOM.AI and Mosaic AI

90% reduction

In data discovery and automated profiling timeframes.
